Hi, I'm Adrian Chapman.

I'm the Executive Director for Place and Economy here at Peterborough City Council.

And I'd like to thank you very much for taking a look at the exciting opportunity that is the Service Director for Infrastructure and Environment. It's a really interesting role, a very challenging role that combines a whole range of different functions from highways and transport responsibilities, delivering multimillion pound transformational projects to improve our infrastructure through to all of our regulatory services, from: licensing, trading standards, through to environmental health, our coroners service, all of our waste and environmental services, including street scene waste management for a growing city.

And underpinning all of that, our climate change program, where we've got some really ambitious climate targets to achieve for our population.

I'm really interested in hearing from candidates who share the vision and passion that I have for our city.

Your technical skills and experience are less important to me than your drive and ambitions to do a great job for our citizens.

So do take a look at the role.

I hope you apply and of course do reach out to me if you'd like an informal conversation.
